

INTRODUCING THE NEW SUPER SELECT+ Tech Series

AP Emissions Technology in collaboration with Aristo has developed another new product that solves difficult emissions problems. The *Super Select Plus* has been developed and produced by Aristo Intelligent Catalyst Technology with a New Advanced Washcoat and Enhanced Metal Loading that improves the efficiency and durability of the catalyst.

Features & Benefits

- Designed, Engineered, and Manufactured Using a New Advanced Washcoat Technology & Enhanced Metal Loading Which Provides Better Performance.
- Superior NOx & CO Light-Off and HC Conversion.
- Lights Off Faster at Lower Temperatures Which Keeps the MIL Off Especially on Newer Vehicles with Intrusive Catalyst Monitoring Strategies.
- Increased Thermal Durability, Extending Lifetime Performance.
- Improved O2 Storage and Function Durability.
- Large 5" Round Stuffed Tube Body, Providing More Substrate Volume.
- Multiple O2 Port Locations to Reduce The SKUs Needed.
- Warranty: 50,000 Miles for the Emissions Requirement.

Advanced Catalysts = Superior Converters

EPA OBD II Converters - 6.2L ENGINE / MAX GVW 9,000 LBS
